

Our **Products**

Instrumentation

Pressure, Temperature, Level and Flow Instrumentation

Valves & Actuators

- Control, On/Off & Selector Valves
- Pneumatic & Electric Actuators

Safety Instrumentation & Systems

- Safety Instrumented Systems
- Burner Management Systems
- Fire & Gas Detection

Networking & Communications

- Device Networking Products
- Ethernet & Serial Communication Products
- Wireless Communication Products
- Fiber Optic Products
- Protocol Analysis Software

Calibration & Test Equipment

- Pressure, Temperature & Multi function Calibrators
- Electrical & Specialty Testers
- Calibration Gases

Consoles, Panels & Enclosures

- Control Room Consoles
- Technology Consoles & Tables
- Control Panels & Junction Boxes
- Instrument Enclosures

Tube Fittings & Accessories

Our **Services**

Fire & Gas Systems

 Industrial Gas Detection & Fire System Services

Calibration & Repair

- Certified Calibration
- Diaphragm Seal & Capillary Filling

Valve Automation

- Quarter Turn, Multi Turn & Linear Valve Automation
- Control Valve Assembly, Testing & Calibration

Safety Life Cycle

- HAZOP Study & Facilitation
- LOPA Analysis
- Safety Integrity Level Determination
- SIL Verification & Justification
- Safety System Design

Control Network Security

- Control Network Security Assessment
- Security Planning & Management
- Control Network Security Systems Implementation

Control Panel Fabrication

- Instrument, PLC & Electrical Panel Design & Fabrication
- Analyzer Sample System Design
 Fabrication
- Solenoid System Design & Fabrication

Systems Integration

We are a total solutions company that provides instrumentation, controls and automation solutions to our customers. We use modern tools & technologies to provide the most effective solutions for your applications. We have the necessary expertise to provide the solutions from "Concept to Commissioning" and long after that.

Provincial Controls is a leading provider of instrumentation, valves, networking & communications products and services to a variety of industries since 1986. Backed by the qualified, experienced and dedicated people we are helping our customers achieve safe, uninterrupted and efficient operation of their facility. We are totally committed to provide products and services that are proven reliable, on time and meet customer specifications and expectations every single time.

Our true strength is our expertise, knowledge and experience in selecting, specifying, sourcing and supplying the right products for your applications. Our sales and applications group executes orders of any size with the same accuracy and diligence each time. We can respond to any standard and custom applications requirements based on your need by accommodating your deadlines and emergencies.

We take great pride in the way we offer solutions driven approach to the specific needs of our customers. We not only sell the products but work with our customers from "Concept to Commissioning" to apply the products correctly to their applications. Our dedicated and knowledgeable service group can also help test, commission, maintain, calibrate and repair everything we sell.

Companies are forced to run leaner in the new millennium and they rely more heavily on the expertise of their suppliers. We take that extra step by making site visits and provide application assistance to assess special application needs. We make sure that our customer gets the assurance that they are dealing with the best in-class professionals.

Quality is our Top Priority

"We will provide quality products and services to meet our customer's requirements, on time, and at a cost that represents the highest value."
