

We provide onsite and in-house test, repair, calibration & commissioning services that fit our customer's requirement every single time.

We have necessary expertise & tools to provide NRC/NIST traceable calibration services for all test & measurement devices.

Our proven safety record enables us to offer best service at a competitive price.

TEST • REPAIR • CALIBRATION • COMMISSIONING

Services Offered

- **In-house calibration & repair**

Quick turnaround time, local pick-up available

- **On-site calibration & repair**

Premium service with same level of quality as our in-house services

Loop & instrument testing and commissioning

- **Mobile calibration & repair**

Fully equipped, weather conditioned mobile van

Equipment Calibration Capabilities

We are fully equipped to perform testing & calibration of following equipment

- **Instrumentation & Controls**

- Pressure
- Temperature
- Level
- Humidity
- pH/ORP
- Conductivity

- **Diaphragm Seal & Capillary**

- Diaphragm Seal & Capillary
- Diaphragm Seal & Capillary Repair

- **Gas & Flame**

- Combustible Gas Detectors
- Toxic Gas Detectors
- Portable Gas Detectors
- Flame Detectors Testing

- **Electrical**

- Multimeters
- Voltmeters
- Amp meters
- Resistance

- **Dimensional**

- Micrometers
- Calipers
- Height Gauges
- Indicators

- **Other Equipment**

- Welding Machines
- Torque Wrenches
- Environmental Chambers
- Balances/Weights

We are experienced in following industries:

- Petrochemical
- Chemical
- Oil & Gas
- Power Generation & Distribution
- Automotive
- Food & Beverage
- Discrete Manufacturing
- Marine & Rail

Isolab Inc. specializes in the calibration of instruments to ISO 9000 and QS 9000 standards. ISOLAB ISO/IEC 17025: 2005 accredited by Bureau Veritas. All calibrations are traceable to NIST. We also provide calibration consultation services for your calibration needs. Our services includes in-house and on-site instrument troubleshooting, repair, checkouts, calibration and commissioning.

Provincial Controls is a leading provider of instrumentation, valves, networking & communication products & services to a variety of industries since 1986. Backed by the qualified, experienced and dedicated people we are helping our customers achieve safe, uninterrupted and efficient operation of their facility. We are totally committed to provide products and services that are proven reliable, on time and meet customer specifications and expectations every single time.

Product quality, operational safety and cost effectiveness relate directly to the accuracy and reliability of the process measurements. Therefore, you should entrust the calibration, maintenance and repair of your measuring instruments to a competent partner. We are fully equipped and capable to meet your requirement for process instrumentation & electrical equipment calibration & certification.

Companies are forced to run leaner in the new millennium and they rely more heavily on the expertise of their suppliers. We make sure that our customer gets the assurance that they are dealing with the best in class professionals.
