

ENGINEERED SOLUTIONS FOR
Instrumentation,
Valves, Networking
& Communication

We represent products from manufacturers who are innovative and true industry leaders in their respective field. Over the years, we have established positive relationships with our manufacturing partners which enable us to cater our customers need effectively. We offer the best quality products at a competitive price.

Our Products

Instrumentation

- Pressure, Temperature, Level and Flow Instrumentation

Valves & Actuators

- Control, On/Off & Selector Valves
- Pneumatic & Electric Actuators

Safety Instrumentation & Systems

- Safety Instrumented Systems
- Burner Management Systems
- Fire & Gas Detection Products

Networking & Communications

- Device Networking Products
- Ethernet & Serial Communication Products
- Wireless Communication Products
- Fiber Optic Products
- Protocol Analysis Software

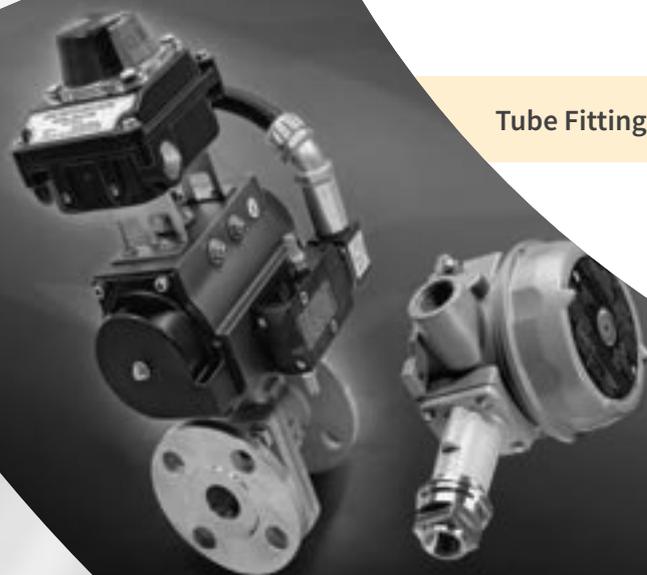

Calibration & Test Equipment

- Pressure, Temperature & Multi-function Calibrators
- Electrical & Specialty Testers
- Calibration Gases

Consoles, Panels & Enclosures

- Control Room Consoles
- Technology Consoles & Tables
- Control Panels & Junction Boxes
- Instrument Enclosures

Tube Fittings & Accessories

Our Services

Fire & Gas Systems

- Industrial Gas Detection & Fire System Services

Calibration & Repair

- Certified Calibration
- Diaphragm Seal & Capillary Filling

Valve Automation

- Quarter Turn, Multi Turn & Linear Valve Automation
- Control Valve Assembly, Testing & Calibration

Safety Life Cycle

- HAZOP Study & Facilitation
- LOPA Analysis
- Safety Integrity Level Determination
- SIL Verification & Justification
- Safety System Design

Control Network Security

- Control Network Security Assessment
- Security Planning & Management
- Control Network Security Systems Implementation

Control Panel Fabrication

- Instrument, PLC & Electrical Panel Design & Fabrication
- Analyzer Sample System Design & Fabrication
- Solenoid System Design & Fabrication

Systems Integration

We are a total solutions company that provides instrumentation, controls, and automation solutions to our customers. We use modern tools and technologies to provide the most effective solutions for your applications. We have the necessary expertise to provide the solutions from "Concept to Commissioning" and long after that.

Provincial Controls is a leading provider of instrumentation, valves, and communication products since 1986. With a dedicated team, we help customers achieve safe and efficient operations by providing reliable products and services that meets their expectations every single time.

Our expertise in selecting, sourcing, and supplying the right products is our strength. We execute all orders with accuracy and adapt to customer needs, accommodating deadlines and emergencies.

We take pride in offering solutions tailored to customer needs, working from concept to commissioning. Our service team also assists with testing, commissioning, maintenance, calibration, and repairs.

In today's leaner business environment, companies rely on our expertise. We go the extra mile with site visits and application assistance to ensure customers get the assurance that they are dealing with the best in-class professionals

Quality is our top priority

We will provide quality products and services to meet our customer's requirements, on time and at a cost that represents the highest value.
